Quantitative Analysis and Socio-demographic Research Finance and Professional Services Indian and Northern Affairs Canada

December 1991

#### **Preface**

Since 1989, Quantitative Analysis and Socio-demographic Research (QASR) has updated the <u>Basic Departmental Data</u> report on an annual basis with the cooperation of the various programs in DIAND.

The 1991 edition was prepared by R. Pierre Gauvin (Project Manager) assisted by Diane Fournier, Connie Gloade and Kimberly Thompson.

#### Introduction

First Nations are assuming greater control over their lands, their social and economic circumstances and the laws which govern them. In the context of the new relationship between First Nations and Canada, it is essential that those involved in this process have available a comprehensive and accurate picture of the progress already achieved by these populations.

<u>Basic Departmental Data</u> is an annual report designed to be a key data reference document on the demographic, social and economic conditions of registered Indians in Canada using departmental administrative databases.

This report provides historical and current statistics on the evolution of the conditions of registered Indians living on reserve over the past 30 years as well as Northerners.

The Department of Indian Affairs and Northern Development (DIAND) is responsible for the well-being of both aboriginal and non-aboriginal populations in the Northwest Territories and the Yukon either in the form of direct program expenditures or transfer payments to the territorial governments. Data in the chapter on the North pertain to the total population unless otherwise indicated.

Statistics for this report are derived primarily from departmental administrative data sources as well as sources from Health and Welfare Canada and Statistics Canada. Subjects covered include: population, education, health, housing and social conditions, self-government and labour force participation.

<u>Basic Departmental Data - 1991</u> includes projections in the Population and Health Conditions chapters. It is felt that users could benefit by having historical and projected trends to gain better insights on the conditions of the registered Indian population.

This report is essentially descriptive in nature. It updates the earlier annual releases of <u>Basic Departmental Data</u> which was first published in 1988. On each subject, the report presents the statistics in textual, graphic and tabular formats on a two-page spread. On the page opposite each table, highlights pertaining to the table are provided as well as a graphic representation of the information. Appropriate notes and sources are indicated at the bottom of each table. Numbers may differ slightly from the previous release due to rounding or program/department revisions. These minor revisions are identified by an "r". More extensive revisions have been made to tables showing expenditure in constant dollars. The constant dollar calculations are now based on the year 1986 rather than 1981.

Throughout this report "Indian" means registered or status Indian, that is, persons with status within the meaning of the <u>Indian Act</u> and whose names appear on the Indian Register maintained by **DIAND**.

In June 1985, amendments to the <u>Indian Act</u> were passed by Parliament. These amendments (Bill C-31) restore Indian status and membership rights to individuals and their children who had lost them because of discriminatory clauses contained in the previous <u>Indian Act</u>.

In 1990, registered Indians comprised 1.8 percent of the total Canadian population. They were generally **affiliated** to one of the 601 bands in the country and **three-fifths** of the population resided on reserve and Crown land.

chart 1

#### Registered Indian Population Growth On and Off Reserve

#### **Highlights**

**The** registered Indian population increased from 224,164 in 1966 to 490,178 in 1990, more than a twofold increase.

With the reinstatement of Indians through Bill C-31, this population is expected to reach approximately 623,000 at the turn of the century, a 27 percent increase from 1990.

Eight out of ten registered Indians lived on reserve in 1966, but this proportion dropped to 60 percent in 1990.

The off-reserve population growth rate, which was quite **significant** between 1986 and 1990, s largely attributed to the reinstatement of Indians under Bill C-31.

- 1. On reserve includes Crown lands and settlements.
- 2. See Glossary for definition of term.

- In 1966, the off-reserve total includes 274 individuals whose type of residence was not stated.
   In 1971, the off-reserve total includes six individuals whose type of residence was not stated.
   In 1985, the Indian Act was amended to allow, through Bill C-31, the restoration of Indian status to those who had lost it due to discriminatory clauses in the Indian Act.

#### Population / Bill C-31

Chart 2

#### Registered Indian Population Growth Showing Bill C-31

### **Highlights**

In 1985, at the beginning of the reinstatement process under Bill C-31, approximately 1,600 C-31 registrants were added to the Indian Register.

In 1990, Bill C-31 registrants represe A approximately 15 percent of the total registered Indian population.

By 1996, roughly 100,000 Bill C-31 registrants and their offspring could be added to the Indian Register, representing approximately 17 percent of the total registered Indian population for that year.

#### **Population / Regions**

#### Chart 3

#### Registered Indian Population by Region

### **Highlights**

While the total registered Indian population has more than doubled between 1966 and 1990, the biggest proportional regional gains south of  $60^{\circ}$  were in Saskatchewan and Alberta. This trend is expected to continue until 2001.

In 1990, nearly a quarter of the total Indian population (23%) was located in Ontario, the largest proportion of all regions, while slightly over one percent of the Indian population was in the Yukon.

#### **Population On Reserve / Regions**

Chart 4

#### Registered Indian Population On Reserve by Region

#### **Highlights**

**The** regional on-reserve promotions (including Crown lands and settlements) in 1990 ranged from a low of 46 percent in the Yukon to a high of 79 percent in the Northwest Territories.

The biggest proportional regional gains south of 60° were in the Atlantic and Quebec regions where the on-reserve population increased by 101 and 86 percent respectively between 1966 and 1990.

South of 60°, Quebec had the highest proportion of its Indian population living on reserve in 1990 (72%) and is expected to be the same in 2001.

While Saskatchewan is expected to have the largest percentage increase (58%) in its on-reserve population among all regions between 1990 and 2001, the Territories also expect high percentage increases (Yukon 46% and NWT 41%).

### **Population Off Reserve / Regions**

chart 5 Registered Indian Population Off Reserve by Region

#### Highlights

The **off-reserve** population increased substantially between 1966 and 1990, particularly since 1985 with the implementation of Bill C-31. The population increased from 43,746 in 1966 to 196,974 in 1990.

The proportion of off-reserve Indians increased accordingly from nearly 20 percent in 1966 to 40 percent in 1990, as most Bill C-31 registrants reside off **reserve**.

#### **Population / Geographical Zones**

Chart 6

#### Registered Indian Population On Reserve by DIAND Geographical Zone

### **Highlights**

The proportion of on-reserve Indians living in urban, rural, remote or special access areas has remained relatively constant between 1971 and 1990.

In 1990, more than a thiid of on-reserve Indians (37%) were located in DIAND defined urban zones while almost one-fifth (19%) of Indians were in special access zones where no year-round road access to the nearest service **centre** is available.

#### **Population / Geographical Zones / Regions**

Chart 7-A

Registered Indian Population On Reserve
by Region and DIAND Geographical Zone
Urban & Rural

1971 🔀 1990

#### **Highlights**

**The** regional proportions of on-reserve Indians living in **DIAND-defined** geographical zones have remained almost constant between 1971 and 1990 (Tables 7-A and 7-B).

Over one-fifth of on-reserve Indians lived in remote and special access areas in 1971.

In 1971, all Indians living on-reserve in the Atlantic region were located in urban and ruralareas while slightly over half of Yukon's and Manitoba's Indians were in these areas.

Manitoba had the highest proportion of its on-reserve Indian population (31%) living in special access areas where no year-round road access to the nearest service centre was available in 1971.

### **Population / Geographical Zones / Regions**

**Registered Indian Population On Reserve** Chart 7-B by Region and DIAND Geographical Zone, 1990

Urban & Rural Remote Sp.Access

#### **Highlights**

**The** regional distribution of the on-reserve Indian population by DIAND geographical zones has remained relatively constant between 1971 and 1990 (Tables 7-A and 7-B).

As in 1971, three-quarters of on-reserve Indians lived in urban and rural areas in 1990.

At least nine out of ten Indians in the Atlantic, Alberta and Saskatchewan regions were located in urban and rural areas in 1990.

•	Tuberculosis	30

#### Life Expectancy

Chart 8

#### Registered Indian Population, Life Expectancy at Birth by Sex

#### **Highlights**

Life expectancy at birth for registered Indians is increasing and will continue to increase.

Between 1976 and 2001, the life expectancy at birth of Indians is expected to increase by approximately 10 years for both sexes.

The gap between sexes in 1976 was 6.5 years in **favour** of females and could climb to 7.2 years by 2001.

Life expectancy for males increased from 59.8 in 1976 to an expected 69.8 years in 2001 while that for females should increase from 66.3 to 77.0 years.

Table 8 Life Expectancy at Birth by Sex, Registered Indian Population Canada, 1976-2001

### Life Expectancy at Birth (1)

Year	Male	Female
1976	59.8	66.3
1981	62.4	68.9
1986	63.8	71.0
1991	65.7	73.0
1996	67.7	75.0
2001	69.8	77.0

# **Mortality Rates**

Chart 9

Registered **Indian** Population Mortality Rates

# Highlight

While the number of deaths between 1955 and 1989 was relatively constant, averaging approximately 1,600 deaths per year over the period, the registered Indian mortality rates have decreased significantly from 10.5 to 4.8 deaths per 1,000 population in 1989.

Table 9 Deaths and Mortality Rates, Registered Indian Population Canada, 1955-1989

Year	Number of Deaths	Mortality Rates (1) (per 1,000)
1955	1,578	10.5 (2)
1960	1,623	8.8
1967	1,932	8.4
1976	1,875	7.3
1982	1,740	6.2
1983	1,658	5.7
1984	1,675	5.7
1985	1,432	6,0
1986	1,380	5.6
1987 (3)	1,405	5.6
1988	1,435	5.3
1989	1,339	4.8

- Notes:

  1. Mortality rates have been calculated using Health and Welfare Canada data. The population numbers are the Welfare Canada and they do not correspond exactly to the Indian population numbers served by Health and Welfare Canada and they do not correspond exactly to the Indian Register population. See Glossary for definition of population served.
- 2. The mortality rate was estimated using the total registered Indian population figure in 1955, derived from Indian Conditions: A Survey, DIAND, 1980.
- 3. Counts and rates since 1987 no longer include N.W.T. Indians because of the transfer of health services to the Government of the Northwest Territories.

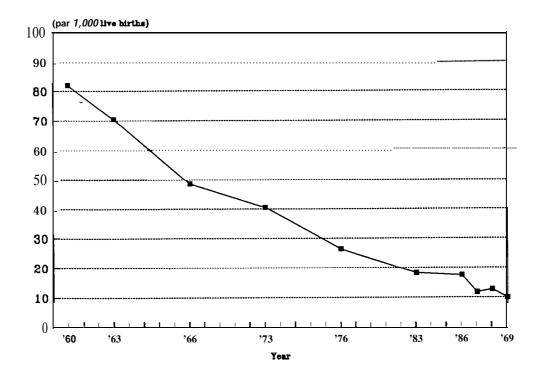

1955-1967: Annual Reports, Health and Welfare Canada.

- 1976: Indian and Inuit of Canada, Health Status Indicators 1974-1983, Health and Welfare Canada, Ottawa,
- 1982-1989: Demographics and Statistics Division, Medical Services Branch, Health and Welfare Canada.

## **Infant Mortality Rates**

Chart 10

## Registered Indian Population, Infant Mortality Rates

## Highlights

One factor in the increased life expectancy of registered Indians is the declining infant mortality

Between 1960 and 1989, infant mortality rates for Indians have dropped dramatically **from 82** to-just under 10 infant deaths per 1,000 live births.

Table 10 Infant Deaths and Infant Mortality Rates, **Registered Indian Population** 

## Canada, 1960-1989

Year	Number of <u>Infant Deaths (1)</u>	Number of Live Births	Infant Mortality Rates (per 1,000]
1960	617	7,522	82.0
1963 -	568	8,071	70.4
1968	n/a	n/a	48.6
1973	273	6,717	40.6
1978	192	7,239	26.5
1983	146	8,029	18.2
1986	119	6,817	17.5
1987 (2)	87	7,465	11.7
1988	100	7,872	12.7
1989	80	8,067	9.9

- Infants are children of one year of age and under.
   Counts and rates since 1987 no longer include N.W.T. Indians because of the transfer of health services to the Government of the Northwest Territories.
- 3. Mortality rates correspond to the population served by Health and Wefare Canada. See Glossary for definition of population served.

## **Mortality Rates by Cause**

chart 11

## Registered Indian Population, Mortality Rates by Major Cause

## **Highlights**

Between 1982 and 1989, Injury and Poisoning has been the major cause of death among registered Indians with an average of 179 deaths per 100,000 over the period. However since 1987, the rates attributed to this cause of death have declined 28 percent.

The second major cause of death during this period has been Circulatory System disorders followed by **Neoplasms** with an average of 138 and 61 deaths per 100,000 respectively.

Deaths associated with Digestive System disorders have decreased in the last seven years, from 34.4 in 1982 to 20.3 deaths per 100,000 in 1989.

## **Tuberculosis**

chart 12

## Registered Indian Population, Tuberculosis Cases

## **Highlights**

The number of tuberculosis cases dropped significantly over the last 34 years from 1,922 in 1955 to 376 in 1989. Since 1980, little improvement in the incidence of this disease has been made in that the number of cases fluctuated between 300 and 400 a year.

Between 1985 and 1987, the number of new and reactivated cases of tuberculosis had risen

31

•	Band-operated Schools	40	
•	Enrolment by School Type	42	

## **Enrolment**

Chart 13 Enrolment in Kindergarten, Elementary and Secondary Schools On Reserve

## **Highlights**

The number of **on-reserve** children **enroled** in elementary and secondary schools has been increasing in the last three decades. It doubled between 1960/61 and 1990/91, reaching slightly over 92,000 students in 1990/91.

**Enrolment** is increasing due both to the increase in the school-age population and decrease in the number of drop-outs.

The percentage of school-aged children living on reserve **enroled** in kindergarten, elementary and secondary schools has increased from 72 percent in 1960/61 to 91 percent in-1990/91.

Table 13

Enrolment in Kindergarten, Elementary and Secondary Schools
On Reserve

## **Enrolment by School Type**

chart 17 Registered Indian Population,
Elementary and Secondary Enrolment by School Type

## **Highlights**

The government's commitment to increased Indian **control** of Indian education is reflected in the **enrolment** trends. The proportion of children **enroled** in band-operated elementary and **secondary** schools is increasing while the **proportion enroled** in federal and provincial schools is declining.

The proportion of children **enroled** in band-operated schools increased **elevenfold** from four percent in 1975/76 to 44 **percent in** 1990/91.

The proportion enrolled in federal schools in 1990, y 1 dropped to 9 percent from 41 percent in 1975/76.

The **proportion** of students **enroled** in provincial schools dropped between 1975/76 and 1990/91, from 53 to 47 **percent**.

## Children in Care

Chart 18

Registered Indian Population On Reserve, Children **in Care** 

## Highlights

The ratio of on-reserve **registered** Indian children in care to Indian children aged 16 and under peaked at about 6.5 percent in the mid-seventies and has since gradually declined to 3.5 percent in 1986/87.

Since 1987/88, the ratio increased slightly to reach **4.0** percent in 1990/91. In 1990/91, the number of children in care stood at 4,352 children.

1981/82-1990/91: Social Development Branch, DIAND.

Children aged 16 and under: Indian Register, **DIAND**.

<sup>1.</sup> The total number of children in care calculated by Social Development Branch is obtained by dividing the total number of case-days by 365. Child care cases do not include preventive and alternate approaches to child and family services (eg. homemakers). See Glossary for definition of Children in Care. Excludes Indians residing in the N.W.T. and Newfoundland.

## **Per Child Expenditures**

## **Highlights**

While the number of children in **care** fluctuated since 1980/8 1, the total expenditures expressed in 1986 constant dollars have been increasing.

Per child expenditures in constant 1986 dollars have increased gradually from approximately **\$6,100** in 1970/71 to just under \$23,550 per child in 1990/91, an almost fourfold increase.

## **Dwellings**

Chart 24 New and Renovated Dwelling **Units** On Reserve

## Highlights

Between 1983/84 and 1990/91, an average of 3,200 new dwelling units per year were built on reserve. In 1990/91, slightly under 2,900 new units were constructed.

Just over 4,000 dwelling units on average per year were renovated between 1983/84 and 1990/91.

Table 24 Total Number of New and Renovated Dwelling Units On Reserve Canada, 1983/84 - 1990/91

## Dwellings (1)

Year	Number of New <b>Dwelling Units (2)</b>	Number of Renovated <u>Dwelling Units</u>
1983/84	3,517	4,380
1984/'85	2,999	3,780
1985/86	2,831	3,250
1986/87	2,929	3,490
1987/88	3,166	4,141
1988/89	3,345	4,538
1989/90	3,958 °	4301
1990/91	2,879 (3)	4,655

- 1. Excludes dwellings in the N.W.T. and Inuit communities of Northern Quebec as well as dwellings of bands under the James Bay and Northern Quebec Agreement since 1984 and the Sechelt Band since 1986. See Glossary for definition of Dwelling.
- 2. Includes dwelling construction funded through regular **DIAND** subsidy and Bill C-31 **DIAND** subsidy.

  -3. There was a change in the reporting method beginning in this year. Instead of including both "starts" (but not completed) and "completions" as was done in previous years, only those units for which final inspection reports were received in 1990/91 were counted.

Chart 25

## On-Reserve Dwellings with Adequate Water Supply and Sewage Disposal

## Highlights

In 1990/91, 86 percent of dwellings on reserve had adequate water supply compared to slightly over half in 1977/78.

The proportion of dwellings with adequate sewage disposal also increased considerably from 47 percent in 1977/78 to 80 percent in 1990/91.

# **Self-government Negotiations**

#### Chart 26

# **Self-government Negotiations**

# **Highlights**

As of September 1991, a total of 142 proposals had been submitted by Indian bands to achieve self-government.

As of September 1991, the Sechelt band and the eight James Bay Cree bands were the only ones to-reach self-government but one proposal was at the final legislative drafting stage. Thirteen proposals involving 50 bands were in the substantive negotiation phase.

Thirty eight proposals are presently at other stages of negotiations involving a total of 127 bands.

# **Alternative Funding Arrangements**

Chart 27

#### **AFA Participation Rates**

# **Highlights**

Alternative funding arrangements (AFA) became available to Indian bands in June 1986 and the first agreement was signed in May 1987. Since then, the rate at which Indian bands are securing authority to manage program funding through alternative funding arrangements (AFA) has continued to increase.

As of March 31, 1991 a total of 102 agreements were signed. Eighty-four of these agreements were signed with individual bands and eighteen with tribal councils and other Indian organizations.

Notes:

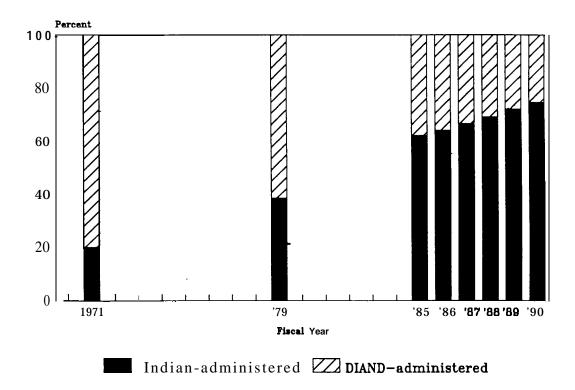

1. Excluded are bands operating under self-government legislation and within the Northwest Territories (NWT).

In the latter case, services are delivered primarily by the territorial government.

<sup>2.</sup> See Glossary for definition of Alternative Funding Arrangements.

## **Devolution**

Chart 28 Indian-administered Expenditures as a Percent of Indian & Inuit Program Expenditures

## **Highlights**

**Indian** control of program expenditures has steadily increased over the past 19 years.

In 1990/91 registered Indians, through Band Councils, Tribal Councils or other Indian organisations, administered 74.5 percent of **DIAND's** Indian and **Inuit** total program expenditures.

Since 1971/72, the number of authorized person-years in the Indian & Inuit Program decreased steadily from 6,556 to 2,913 in 1990/91, a 56 percent decrease.

# North / Infant Mortality

Chart 35

#### Infant Mortality Rates, Yukon and the Northwest Territories

# Highlight

Infant mortality rates in the two territories declined **significantly** over the last 28 years. The Northwest Territories experienced the steepest decline, from 111 deaths per 1,000 live births in 1961 to a rate of 16.2 in 1989, but for most years maintained a higher rate than the Yukon. Because of the small populations involved, random fluctuations **in** rates from year to year are to **be** expected. Small changes are of no statistical significance.

# North / DIAND Expenditures

#### Chart 36

## **DIAND** Expenditures on the North

#### **Highlights**

Total **DIAND** expenditures on the North have steadily increased since 1981/82. The 1990/91 planned figure **represents** a conservative estimate of expenditures, but actual figures will most likely follow the upward trend.

Since 1984/85 direct **DIAND** expenditures have decreased in conjunction with **devolution** of **DIAND** programs, **primarily** to **GNWT**. The sharp increase **forecast in** 1989/90 is due **primarily** to DIAND's continuing responsibilities in the Yukon. Increases focus on capital facilities and community resources for Indian bands and the management of renewable resources.

## chart 37 Aboriginal and Non-Aboriginal Employment Distribution, Yukon and the Northwest Territories

Yukon Employment Distribution Population 15 Years and Over

N.W.T. Employment Distribution Population 15 Years and Over

## Highlight

Since 1971, the percentage of aboriginal aged 15 and over who are employed has increased in both territories, most notably in the Yukon. However, the aboriginal employment population ratios in the N.W.T. and Yukon remain substantially lower than those for non-aboriginals.

Table 37 **Employment Distribution of Population 15 Years and Over,** Yukon and Northwest Territories

1981: Statistics Canada, Census of Canada, Native Peoples Summary Tape.

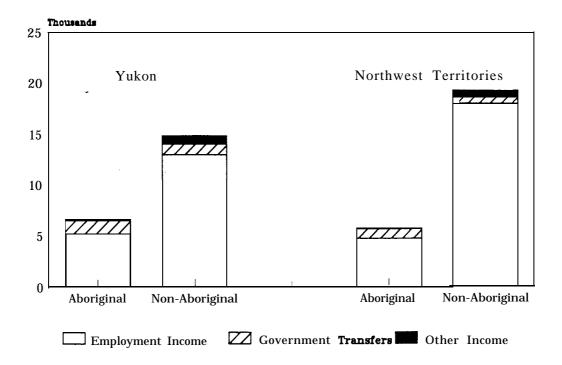

1986: Statistics Canada, Census of Canada, Special Tabulations for the Strategic Analysis Division, DIAND.

<sup>1.</sup> In 1971 only two aboriginal origins were identified, Indian and Inuit. Those with Métis origin therefore may have been included as Indian or as some other non-aboriginal origin. There are no separate counts for Métis available. In 1981 and 1986, Métis "ethnic origin" was recognized as a separate aboriginal origin.

# North / Per Capita Income

Chart 38

## Per Capita Income by Source, Yukon and the Northwest Territories, 1985

# **Highlights**

The gap between aboriginal and non-aboriginal total income per capita is greater in the Northwest Territories than in the Yukon. In 1985, per capita income for aboriginal in the Northwest Territories was approximately 30 percent that of non-aboriginals while this percentage was 45 percent in the Yukon.

The difference in aboriginal income per capita between the two territories is largely due to the higher levels of both employment and government transfer income per capita in the Yukon.

Statistics **Canada**, 1981 and 1986 Censuses of Canada. Special tabulations for the Strategic Analysis Division, **DIAND**.

<sup>1.</sup> Data are for the 1980 and 1985 calendar years, as-reported in the 1981 and 1986 Censuses of Canada. Per capita figures are based on the population figures shown in Table 33.

#### Glossary

#### **Adequate Water Supply:**

Refers to the presence of pressurized potable water (i.e. piped, well, trucked, other) in a housing unit.

#### **Adequate Sewage:**

Includes the presence of lift stations, septic systems, forcemains, sewage collection mains, manholes, service connections, treatment plants, lagoons and outfall sewers and appurtenances, but excludes plumbing and fixtures.

#### **Adults in Care:**

DIAND provides funding for care in Type I and II institutions which may be located on reserve or operated by the province. Individuals must be assessed according to provincial standards to determine the level of care required. Residents of institutions are elderly and disabled persons in need of supervision and assistance.

#### Type I:

"is that required by a person who is ambulant and/or independently mobile, who has decreased physical and/or mental faculties, who requires primarily supervision and/or assistance with activities of daily living and provision for meeting psycho-social needs through social and recreational services. The period of time during which care is required is indeterminate and related to the individual condition";

#### Type II:

"is that required by a person with a relatively stabilized (physical or mental) chronic disease or functional disability, who, having reached the apparent limit of his recovery, is not likely to change in the near future, who has relatively little need for the diagnostic and therapeutic services of a hospital but who requires availability of personal care on a continuing 24-hour basis, with medical and professional nursing 's supervision and provision for meeting psycho-social needs. The period of time during which care is required is unpredictable but usually consists of a matter of months or years".

From <u>Adult Long Term Institutional Care</u>, Report of the Sub-Committee on Special Services in Hospitals, 1984.

#### **Alternative Funding Arrangements (AFA):**

AFA agreements were established by **DIAND** with Indian bands (and/or tribal councils) to allow new and more flexible financial and administrative arrangements in which the primary accountability of the band council is to the band members.

#### **Average Annual Growth Rate:**

The following formula was used to calculate average annual growth rates:

$$AAGR = (X_1/\sim)$$
 'in-I

where:  $X_1$  = data for the most recent year in period  $X_0$  = data for the earliest year in period n = length of period (years).

#### **Bill C-31:**

"Passed by Parliament in June 1985, Bill C-3 1 contained important amendments to the <u>Indian Act</u>. It had three principal goals:

to eliminate discrimination based on gender and marital status in the Indian Act;

to restore Indian status to victims of past discrimination; and

to enable Indian bands to assume control over their membership.

As a result of Bill C-31, the <u>Indian Act</u> now essentially treats men and women equally when determining status, and prevents anyone **from** gaining or losing status through marriage." From <u>Lands</u>, <u>Revenues and Trust Review</u>, <u>Phase II Report</u>.

#### **Children in Care:**

Is defined as the number of children who had to be placed away from parental care in order to protect them from neglect and/or abuse or prevent neglect and/or abuse.

#### **Devolution:**

Refers to the transfer of services and programs from **DIAND** control to Indian bands, tribal councils and other Indian authorities.

#### **Dwellings:**

Defined as living accommodations (with at least one separate bedroom) irrespective of occupancy, level of completeness or need for renovation or replacement.

#### **Geographical Zones:**

Urban: Is a zone where a band is located within 50 km from the nearest service

centre with year-round road access.

Rural: Is a zone where a band is located between 50 km and 350 km from the

nearest service centre with year-round road access.

Remote: Is a zone where a band is located over 350 km from the nearest service

centre with year-round road access.

nearest service centre and, as a result, experiences a higher cost of

transportation.

Service Centre: Is a community where the following services are available:

a) - supplies, material and equipment (ie. construction, office)

b) - a pool of skilled or semi-skilled labour

c) - at least one financial institution, and

d) - provincial and federal services.

#### **Indian Register:**

"The Indian Register is a list of all registered Indians (as defined in the <u>Indian Act</u>) which is kept by DIAND. <u>Information</u> on this list concerning the demographic characteristics of 'the Indian population is updated regularly by band officials and

published for December 31 of each year." From Lithwick, Schiff, Vernon, <u>An Overview of Registered Indian Conditions in Canada</u>, INAC, 1986.

#### Life Expectancy:

"Is an estimation of the average number of years of life remaining to each member of a group of persons. It is calculated on the basis of observed age-specific mortality rates at any particular moment in time, assuming that the risks of dying remain constant from the moment of estimation until the death of all members of the group." From Wilkins, Russell, <u>Health Status in Canada, 1926-1976</u>, Institute for Research on Public Policy, May 1980.

#### **Population Served:**

Vital statistics are reported by the regions and represent individuals served by the Medical Services Branch (MSB, Health and Welfare). The population at risk should be population served, not total registered Indian population. Crude rates are calculated using population served as reported by the regions. MSB data are subject to variations in coverage. Some regions obtain statistics for both on and off-reserve Indians (Manitoba, Saskatchewan, Alberta and the Yukon) whereas other regions obtain figures for most on-reserve Indians only (Atlantic, Quebec and Ontario). The coverageexcludes Indians in British Columbia and, since 1987, those living in the Northwest Territories because of the transfer of health services to the Government of the Northwest Territories.

#### **Recipients:**

**Are** defined as those individuals who receive social assistance payments whereas **Dependants are** all individuals who benefit from the payments.

#### **Self-government Negotiations:**

**Process** in which government authority is transferred to Indian and Inuit people. The following steps are required:.

Legislative drafting:

New arrangements being affected through legislation.

#### Substantive negotiations:

Negotiations leading directly to new arrangements which will be effected through legislation.

## Framework negotiations:

Terms of reference for negotiations: a community's itemization of the -authorities desired beyond the <u>Indian Act</u>, the proposed modifications to its governing structures and the new legislative arrangements sought to enable these changes. Workplan and budget for-substantive negotiations and the ratification process for any agreements.

## Developmental:

Research and community consultation.

#### Workshops:

Meetings held by a community or communities to explore and discuss self-government issues and exchange information and experiences among communities.
