THE RETAIL FOOD AND BEVERAGE MARKET

THE RETAIL FOOD AND BEVERAGE MARKET

prepared for

The Japan Trade Development Division Department of External Affairs

Canadian exporters are discovering a new Japan. Firms which have focussed their efforts on specific target market segments have seen their results soar. Their success bears witness to important changes which have recently occurred in the Japanese market.

Since themid 1980s, the substantial appreciation of the yen, Japan's concerted policy of domestic demand stimulation and a shift towards a more open import regime have significantly enhanced the competitiveness of Canadian goods in the Japanese market. Specific opportunities have emerged in areas previously closed to foreign suppliers.

This "Export Opportunities in Japan" series is published by the Department of External Affairs to assist Canadian exporters in seizing these exciting new opportunities, It pinpoints specific market segments where new Japanese import demand meets proven Canadian capability, It includes market segment profiles, details specific market technical characteristics, documents success stories and provides market bibliographies and key contact lists.

The series is designed not only as a reference and guide but also as the basis for future joint marketing actiorby Canadian firms, their trade associations and Canadian government departments. The series has been produced in consultation with the Japanese Export Trade Organization (JETRO) and has the support of the Japanese Ministry' of International Trade and Industry (MITI).

The present study is an in-depth survey of the Japanese retail food and beverage sector. It provides an overview of the growing Japanese market, describes the types of retailers and introduces many of the major participants, with pertinent details about their operations. Thestudy was initiated and supported by the Japan Trade Development Division of the Department of External Affairs, Further information and guidance is available from:

Japan Trade Development Division (PNJ) Department of External Affairs 125 Sussex Drive Ottawa, Ontario Canada KIA OG2 Telex: 053-3745 Fax: (61 3) 996-9288/996-9103

The Canadian Embassy in Japan has made important contributions to this series of market studies. Additional assistance and information is available from the Embassy in Tokyo:

1 Overview

The Economy

Japan has the second largest economy in the free world, exceeded only by the United States. From 1982 to 1986, Japan's economy grew at an average annual real rate of 3.7 per cent. Japanese government forecasts are for continued economic growth at a 3.75 per cent rate over the next decade. With the recent increases in the value of the yen, the Japanese have also attained the highest level of per capita GNP among industrialized countries. Japan is an inefficient food producer with limited land under cultivation, small farms, and labour-intensive agricultural production. Japan has arable land of **4.6** million hectares, which is only about one-tenth the amount of equivalent arable land in Canada. The average farm is just 1.1 hectares in Japan, compared to 152hectares in Canada. Furthermore, these small Japanese farms support an agricultural population of 4838 thousand, approximately nine times the 513 thousand Canadians dependent on agriculture for their livelihood.

Japan imported \$150 (U.S.) billion worth of goods in 1987. Broken down, this amounted to 41 per cent raw materials and fuels, 15 per cent food, 13 per cent capital goods and five per cent consumer goods, Food product imports can be further broken do-win as follows (1986 figures):

Product	% of Total Food Imports
Meat and Meat Preparations	13
Dairy Products and Eggs	1
Fish and Fish Products	18
Cereals and Cereal Preparations	18
Vegetables and Fruit	12
Fancy Foods	8
Beverages	2
Tobacco	3
Other	25
Total	100

The result of this agricultural inefficiency is Japan's declining capability to feed itself. As shown in Table 2, Japan's food self-sufficiency ratio has declined from 90 per cent in 1960 to 70 per cent in 1986. The decline was particularly evident in wheat, pulses, fruits and nuts, meat and seaweeds.

Given the large market size, a continuing strong open market economy, and high dependency on food imports, Japan, in the long-term, must be considered a market of good potential for food exporting countries,

Population

In 1987, the total population of Japan was 122 million, This is expected to increase slowly to 130 million by the year 2010, after which there will be a gradual decline, Of the total population, approximately 61 per cent is concentrated around the three major metropolitan areas of Tokyo (Kanto area - 39 million people), Osaka (Kinki area -20 million) and Nagoya (Tokai area - 14 million), allowing relatively easy access for sales and marketing activities to most of the population, Land values are extremely high in these major centres, resulting in growing suburbanization. A more car-oriented commercial structure has followed the population into the suburbs, leading to strong growth in supermarkets and fast food stores in recent years.

One of the most significant changes occurring in the

Japanese population is the rapidly growing proportion of senior citizens - from approximately 10 per cent of the total population at present to 22 per cent by 2020, This will be a higher growth rate than that experienced in other developed countries.

The average Japanese household in 1985 was 3.1 persons, down from 4.1 in 1965, Fewer couples now live with their parents and there are more single-person households than previously.

Japanese women now constitute 40 per cent of the total labour force, and 60 per cent of these women are married. thus contributing significantly to the growing affluence of the average Japanese family.

The smaller households, coupled with high disposable income and more working housewives, have created a greater demand for frozen, ready-made and other convenience foods,

Household Expenditure

In the past five years, the average income growth rate of 3.2 per cent has steadily outpaced the inflation rate of less than one per cent. The average annual household income in 198- stood at Y5 j million or about \$53000 (Cdn) (Canada S 1 = Y104)*. of which fully 84 per cent was disposable (gross income less taxes and social welfare deductions),

This growth in income has influenced Japanese spending patterns. Alarge proportion of Japanese consumer expenditure is shifting from basicfood and shelter to more non-essentials such as services and leisure activities. The proportion of household income spent on food fell from 36 per cent in 1965 to 25 per cent by 1987 (See Figure 2), but food still remains the second largest expenditure category.Consumer durables such as colour TVs. refrigerators, washing machines. etc. have reached the saturation point: more than two-thirds of Japanese households owna car.

* 1)1 this profile the exchange rate used is Cdn \$1=¥104.

2 Retailing in General

There are six categories of establishments that makeup the Japanese retail trade: 1) department stores; 2)superstores/supermarkets; 3) convenience stores; 4) co-ops; 5) specialty stores – shoe stores, butcher shops, etc.; and 6) others – general retailers, mom and pops, etc. Total 1985 retail sales by type of store is given in Figure 3. Of the ¥101 719 billion (\$978 billion Cdn) in retail sales, fully 78 per cent is handled by specialty and other stores. The remaining 22 per cent is controlled by the department stores, supermarkets and convenience stores.

Figure 3

Total Sales Volume in Japan by Store Type Fiscal Year 1965 – 101719 Billion Yen (\$976 Billion**Cdn**)

Source: "Census of Commerce. "MITI.

Perhaps the greatest difference in the retailing systems of Japan and North America is the prevailing dominance of specialty stores and other small shops in Japan. As shown in Table 3, there are still over 1.5 million of these small stores, or almost 94 per cent of all the retail outlets in Japan, accounting for about 7'0 per cent of total retail sales. Generally, these small shops are clustered tightly together in neighbourhood shopping districts or ''Shotengai.'

Japan's shotengai have not changed greatly in structure despite the rapid modernization of other areas of Japanese society. Basicall>'. the shotengai form in areas where people tend to gather. In Tokyo, for example. the immediate areas around the myriad of commuter train stations are the most common places for shotengai. Shotengai can vary greatly in size and usually consist of a selection of basic stores such as fruit and vegetable shops, meat stores, fish stores, liquor stores, dry cleaners, etc. Over the last 10 or 20 years. there may have emerged in the shotengai a supermarket and a convenience store.

Japanese retail sales have grown remarkable over the last 10 to 15 years. Between 1976 and 1985, total retail sales volume in Japan increased 1.8 fold or an annual growth rate of almost seven per cent compounded, Also, self-service stores such as supermarkets and convenience stores increased their proportion of total retail sales from 19.7 per cent in 1982 to 22.1 per cent in 1985. Most of this loss in market share was felt by the other smaller retailers, though department stores also declined slightly, Self-service stores should continue to increase their market share. Convenience stores, in particular, are expected to continue their rapid growth for several years.

3 The Retail Food Sector

Total food retail sales inJapan in 1985 were ¥33221 billion (\$3 19 billion Cdn). These are broken down by store type in Figure 4. similar to the categories above, except that specialty stores and others are combined. Just as with retail sales in general, the largest proportion of food sales(49.8 per cent) is handled by specialty stores and small retailers. Supermarkets were the second largest category, followed by convenience stores and department stores.

Figure 4

Retail Food and Beverage Share by Type of Outlets **1985** Sales–33 221 Billion Yen (\$319 Billion**Cdn**)

Source: "Census of Commerce," MITI. "Japan 1989". Japan Institute for Social and Economic Affairs.

Retail food sales, as taken from the last two commercial censuses, increased ¥4.5 trillion from 1982 to 1985, which is equivalent to a compound annual growth rate of about five per cent. Paradoxically, this occurred while the average Japanese household was shifting a small percentage of its disposable income away from food to more leisure and non-essential expenditures.

Food retailing in Japan was originally the total preserve of specialty stores and general retailers. Supermarkets and superstores, with their large food sales areas of upwards of 1 500 square metres, are a relatively modern occurrence and did not make their first appearance in Japan until the mid-1950s. Even then, the larger stores did not grow in number very rapidly until the boom period of the late 1960s and early 1970s. Department stores, taking their cue from the supermarkets, also expanded their handling of food to the point of creating food floors — usually an entire floor in the basement devoted to the sale of food and beverage.

The dramatic growth of the supermarket chains was cut short in the mid-1970s by the passage of a law to protect the smaller retailers. The law required that any new store over 1 500 square metres receive the consent of the local shopkeepers before it be allowed to open. This law sent a shock through the supermarket industry, but proved very effective in maintaining the neighbourhood shops, which are declining, but only very slowly.

In the 1985 census (Table 3) the government counted over 67 150 supermarkets in Japan, having total sales of over ¥19.2 trillion (\$184 billion Cdn).Many of these stores would be far smaller than what isnormally considered a supermarket in North America.

As can be seen from Figure 4, the Japanese housewife still relies on the small general retailers and specialty stores of the neighbourhood shopping district(shotengai) for a majority of her food needs. These small stores account for no less than 49 per cent of all the food sold through retail outlets in Japan. The Japanese housewife generally shops once a day at the local stores either by bicycle or on foot. Shopping is generally done for that day's consumption and purchased food quantities are usually smaller than is common in Canada. Even at a supermarket the average purchase is only about ¥1500 (approximately \$14 Cdn). There is not a great deal of bulk purchasing. Staples such as rice orsoya sauce, that are bought in large quantities, are often purchased from specialty stores which will deliver the products. There is a slow evolution of small independent retailers forming chains; many of the small retail stores have bought chain store franchises or joined voluntary chains. One of the major benefits of joining these chains is lower merchandise **costs** brought about through group purchasing. Some of the better organized chains also train personnel and bring a more scientific approach to store management. Among the fastest growing of these chains of small stores are the convenience store chains such as Seven-Eleven or Lawson's which are in the midst of a boom.

In the following sections, the food retailing industry is discussed in regard to each of the major categories of retail store type: department stores, superstores/ supermarkets, convenience stores, co-ops, specialty stores and general retailers.

Department Stores

Department stores in Japan can be divided into two groups. One is the traditional group of stores, some dating back 300 years, that includes Mitsukoshi, Matsuzakaya. Matsuya, Takashimaya, Sogo and Daimaru. The second group consists of stores that were established in more modern times and usually are connected with suburban train lines. The train lines established these stores as both an attraction and a convenience for people living along their commuter routes. These include Seibu, Tokyu, Odakyu, Hankyu, Tobu and Meitetsu. Usually, these stores enjoy prime sites at, or near. the main terminals of their parent railroad companies. In general, the older department stores tend to be more elegant with more expensive products than the newer stores, though Seibu is one major exception.

Until19⁻³, department stores were the largest retail companies. Since that time this position has been largely taken over by the superstore chains. The department stores have tried to distance themselves from their superstore competitionby offering luxury goods and a more sophisticated and prestigious atmosphere. Fashionable clothing and personal goods form their main strengths and account for 50 per cent of department stores' sales. Recently some of the superstores have been trying to move into the department stores' market by opening higher grade subsidiaries.

The major differences between department stores in Japan and those in North America include:

Food Floors: With the exception of Marui, virtually all major Japanese department stores have a basement food floor. and sometimes two floors. Fully 20 per cent of the average department store's sales are accounted for by these food floors, which are typically the noisiest and most crowded floors in any department store.

Often, department stores will rent space on their food floors to specialized food wholesalers or retailers, who will manage their own operation inside the department store, Such specialized retail companies can include branches of well-known pastry shops, specialty meat stores, Chinese food, coffee retailers, green tea retailers, etc. Sales and rental arrangements between the store and the specialty retailer vary according to the store, but usually involve the payment of a fixed percentage of the sales to the department store.

Variety: Generally, a full-size Japanese department store has a significantly wider variety of products than its North American counterpart.

Gift Foods and Beverages; While this sector is not limited to department stores it is mentioned here because department stores hold a large portion of the market, Gift foods are specially prepared packages of food or beverage which are sold at the two gift-giving seasons of December and July. For example, salad oil companies will offer attractive gift packages of three, four or five cans of salad oil, or whisky makers will offer two bottles of whisky in a crafted wooden box, Gift food packages are generally made up of only one type of food, but can include several varieties. The gifts may consist of cheese, butter, tea, wine, coffee, ham, sauces, fruit juice, jam or a variety of others. There are also many popular non-food gift packages — towels or soap being among the most common,

The major reason department stores command a significant portion of this market is due to the prestige factor. All gifts are wrapped in attractive paper with the department store's name. Sending a present from a quality department store is clearly favoured over sending the same present from a superstore or other less prestigious establishment. This is particularly important to the Japanese because the recipients of these presents are often business related such as a person's superiors or major customers. Takashimaya department store is the market leader in gift sales.

Restaurant Floors: Most department stores have restaurant floors, usually on the top floor(s). The restaurants are usually independent of the department store. The restaurants are always reasonably priced and there may be six or more to a floor, Types of restaurants include sushi. noodle shops, Chinese food. steak houses, Western food. etc.

The food products found in a department store are usually of a specialty nature or of a higher quality and price than foods in a supermarket, This is typical of department stores in that most products, food and nonfood, are intended for a more affluent clientele. One of the great weaknesses of the major Japanese department stores is the failure to adequately penetrate the suburbs. Suburban shopping centres built around major department stores are not common in Japan.

Superstores and Supermarkets

Supermarket chains in Japan follow two basic types. One is the type of supermarket that a North American would easily recognize — a large, one- or two-floor, self-service store that sells mainly food. The other type of supermarket chain in Japan is often called asuperstore chain and combines a typical food supermarket with a high-volume, low-priced department store. Superstores are often four to five stories high and about 9000 square metres or four times the size of a typically large North American supermarket. The food floor in a superstore is usually the first floor, but food generally only accounts for 30 per cent to 35 per cent of total safes.

The superstore chains such as Daiei, Ito-Yokado and Seiyu, among others. enjoyed tremendous growth from the 1960s until the mid-1970s. As a result, the five largest superstore chains are now the five largest retailers in Japan, having surpassed the biggest department store, Mitsukoshi. The superstore chains owe their rapid growth to several factors — aggressive advertising, a mass market strategy, and the onset of an affluent consumer society. Also important was their strong advance into the suburbs — with little suburban competition from the department stores.

In the mid-1970s, a new law was passed limiting the size of any new supermarket to 1 500 square metres unless it has the consent of local small retailers. Since such consent is naturally difficult to attain, this law has severely hampered the further expansion of superstores. As a result, the superstore chains have diversified into a variety of activities, including small supermarket chains, convenience store chains, restaurants and fast food, specialty store chains. consumer finance, mail order shopping, etc.

In the three years up to 1985, the growth rate of the supermarket/superstore chains continued at about 5.4 per cent per year. Moderate growth is expected to continue, but the heady years that brought 89 supermarket and superstore chains into the top 200 of the nation's retailers, accounting for more than half of the top 200's total sales, are likely over.

Over the last 5 to 10 years, medium and large supermarkets have organized mainly for the purposes of joint purchasing, domestically} and overseas, but also to ease development of private brands, or to develop merchandising or staff training programs. A description of some of these groups is given in Table 4.

Table 4

14

Supermarket Centralized Buying Organizations

Supermarker Gentralized Duying Organizations
AIC Inc. (AUied Import Co.) 2-4 Kanda Jinbo-cho, Chiyoda-ku, Tokyo 101 Tel: 230-2788 Telex: 2325034 AICINC J
Members: six companies: JUSCO, Uny, Izumiya, Chujitsuya, Safeway (U. S. A.) and Promodes (France).
Total Purchases: (1987) ¥46 billion.
Outline: AIC was established in 1979 for joint importation of goods by five supermarket chains (one has since left). Safeway joined in 1981. AIC purchases about Y-0,3 billion of products from Safeway and supplies ¥1.0 billion of goods to Safeway.
Present share of AIC capital is: Japanese supermarkets Promodes 94.4% 4.3 */0
CGC Japan Co., Ltd. (Co-operative Grocer's Chain) 2-1-4, Okubo, Shinjuku-ku, Tokyo Tel: (03) 203-1111
Members: 26 I medium/small supermarket chains, including Olympic shopping Center, Lion-do. Hello Foods, Maruya and Santoku. Daiei, the largest retailer in Japan, also has a tie-up with CGC.
Total Purchases: (1987) ¥268 billion, of which ¥13 billion is imported goods.
Outline: CGC was setup in 1973.Daiei concluded a tie-up in 1980 establishing a joint venture, Glory, for development of merchandise and staff training, CGC has eight distribution centres in Japan and plans to add 22 more. In 1985, they set up a joint venture, Sun Fresh Japan, with a Japanese wholesaler, to import fruit, Acompany with annual sales under ¥2.0 billion cannot participate in CGC. However, a new organization is being established to cater to smaller stores.
Nihon Ryutsu Sangyo K.K. (Nichiryu) Osaka Shiga Bldg., 3-16-1 Honcho, Higashi-ku, Osaka Tel: (06) 264-6711
Members: 15 companies, includingHeiwado, Izumi, Chain Store Okuwa, Sato, Grand Tamakoshi. Yaohan Dept. Store, Kin- sho, Nacfa-Kobe Consumers Co-op., Kasumi, Kintetsu Tokai, Sunny Mart and Seikatsu Kyodo Kumiai Shimin Seikyo.
Total Purchases: (1988) Y104 billion — equivalent to eight per cent of members' total sales.
Outline: Nichiryu was organized in 1974 and has member stores throughout Japan, except Tohoku and Kyushuareas. Nichiryu is an active developer of private brands. Efforts are now directed towards imports and non-store retailing.
NAC (Nippon Aflied Chain) Nisshin Tatemono Semba Bldg., 3-29, Kita Kyutaro-machi, Higashi-ku, Osaka Tel: (06) 245-4741
Members: 191 medium/small supermarkets and voluntary chains, led by Nichii.
Total Purchases: (198-) ¥78 billion — equivalent to 44 per cent of members' total sales.
Outline: NAC was organized by Nichii in 1973. It purchases mainly clothing and has a tie-up with Emco Distributors of U.S.A. for consultation on service merchandising.
Selco Chain (Self-Service Co.) Echo Akihabara Bldg., 1-10-3 Taito, Taito-ku, Tokyo Tel: 834-4821
Members:122medium/small supermarkets.
Total Purchases: (1987) Y4.8 billion — equivalent to 1.5 per cent of members' total sales.
Outline: The Selco Chain was established in 1962. It joined 'Glory' (see CGC) in 1981 for the joint distribution of food.

Convenience Stores

Over the last fern-years, convenience stores have been booming in Japan and the trend is expected to continue in the immediate years ahead. Total number of stores in 1985, both chain and independent, was 29236. It is believed there willbe 50 000 stores by the early 1990s.

While there is no specific definition of a convenience store, there are basic similarities such as:

- longer operating hours of usually 12 to 24 hours per day;
- the handling of convenience goods, small packaged meats, snacks, con-m-ton beverages and usually some fast food;
- brightly lit, self-serve stores of about 100 square metres in size;
- products are sold at list price, or at a slight premium over supermarkets.

The product mix of convenience stores varies from chain to chain. Some offer no fast food, others sell considerable amounts of fresh meat and vegetables, while some even handle small consumer durables such as toasters or rice cookers. Generally, food products, including processed, fresh or fast foods, make up about 90 per cent of total sales,

Most of the cent.enience store chains in Japan grow mainly through the conversion of existing independent retailers into their chains, rather than through the creation of completely new stores. The chains therefore look upon the hundreds of thousands of general retailers and mom and pops as a large pool of potential franchisees, The convenience chain's appeal is its more scientific approach to retailing, and its clean, bright, well-organized stores, The chains also will train those who will run the store. and help these owners to be more professional and efficient. Some of the larger convenience store chains command a royalty of up to 45 per cent of total profit from their franchisees.

Some chains of small stores are called mini-supers. The 33 chains of mini-supers distinguish themselves from the convenience stores in several ways:

- maximum of 12 operating hours;
- directing their competitive efforts more at supermarkets by offering discounts and trying to sell in volume;
- mini-super chains can have stores over 500 square metres in size, though most are about the same size as convenience stores;
- products are very similar to a supermarket though with less selection.

The most successful of the convenience and mini-super chains in Japan is Seven-Eleven. Since opening its first store in 1974, Seven-Eleven has grown to 3 121 outlets and sales of ¥95 billion. In many ways Seven-Eleven's style of store has been the model that most other convenience stores have appeared to copy. Few others have matched the scientific approach that Seven-Eleven has taken to its retailing business. It is, for example, the first chain to employ a Point-of-Sale (POS) system in all its stores, which is similar to the UPC system used in North America.

Co-ops

Co-operative food retail has its origins in two types of co-operative organization. One is the consumer organized co-operatives, which usually have their roots in housewives or neighbors organizing to form jointpurchase groups to realize volume discounts. Some of these consumerco-ops have grown into large organizations with their own co-op brands, of which some may even be manufactured by the co-operative. The largest is the Nada-Kobe Consumer's Co-operative Society, with 105 stores and total sales in 1986 of ¥256 billion.. (See Table 5.)

Table 5

15

Altogether, there are 2300 consumer co-operatives, with a membership of 4 million households, and total sales of about ¥1317 billion(\$12.7 billion Cdn), or accounting for 1.3 per cent of total sales of the retail industry in 1985, About 60 per cent of co-op stores are small, having floor space of less than 100 square metres. Some, however, are full-size supermarkets,

The other type of co-operative is the agricultural cooperative, Nokyo.Nokyo is an enormous nation-wide agricultural organization with about 5 million member households. Among Nokyo'smany activities is its "A Co-op'' chain of food stores, which in 1985, consisted of about 2000 stores with sales of ¥800 billion. The "A Co-op'' is active in the development of co-op brand products.

Both the agricultural and consumersco-ops are growing, improving their organizations, and expanding their range of services. Consumer co-ops alone are expected to increase sales by 33 per cent to ¥2 000 billion (\$ 19.2 billion Cdn) within a few years.

Specialty Stores

Specialty stores are the largest retail and food retail distribution channel in Japan in terms of the number of stores, employees and sales. Specialty stores are defined as stores which employ face-to-face selling and make over 90 per cent of their sales through certain product categories like produce, fish, alcoholic beverages, etc.

In non-food sectors, specialty stores are steadily losing their market share to the larger specialty store chains. In the food sector, however, the major competition is the supermarkets and convenience/mini-super store chains. The specialty stores' loss of business to the supermarkets has been slowed by the law limiting the size of new stores, but the general trend over the last decade has still been towards continued growth in the overall market share of self-service stores.

Others – Small Retail Stores

Small retail stores. commonly known as momand pop stores, constitute a major part of the retailing sector and amount to some 520000 stores in Japan. These stores usually handle several product categories such as food, beverages, household goods, etc.; they are small and only marginally profitable. The mom and pops often have a loyal customer base, These small retail stores are declining only \$10w1v. The stores are legally protected from intrusion into their neighborhoods by large supermarkets. Many, however, may join voluntary or convenience store chains, which will provide operating know-how, volume discounts and personnel training.

4 Department Stores

The following section is divided into two parts. The first is a ranking bysales of the top 50 department store companies in Japan giving such basic information as the address, the number of stores, the 1987-1988 sales volume, and the food and beverage percentage of total sales.

The second part is a more detailed outline of each of the top 12 department stores. This outline is made up of a description of the major features and activities of the store, and a table giving basic operating data.

Seibu is the largest department store chain in Japan. Seibu Department Store is part of the family-runSeibu Saison Group, which includes 100 companies and over 77000 employees,

Seibu has become the largest department store in Japan, recording annual sales of ¥648 billion for the year ending February 1988, surpassing Mitsukoshi for the first time. It operates 12 stores and the company has expanded business rapidly by opening new stores in major cities and affiliating with local department stores such as Darumaya Seibu, Gobankan and Matsukiva a. Seibu Department Stores is the corecompany in "the retail group; it has capital tie-ups with most of the companies of the retail group. including Seiyu, another kc>' company. Accordingly, the company is regarded as a source of capital for the group, But in 1987, Saison Corporation was established to control the group companies as a whole. This means that Seibu Department Stores is theoretically no longer the central fundraiser for the group, Sales at its main store. Seibu Ikebukuro. reached ¥344 billion for the year ending February 1988, the highest figure of any single store in Japan,

Seibu Department Stores is expanding into the Kansai area of Japan. The company will open a store in Osaka i_n1990, with plans to open another three stores in Kansai in the near future. Seibu is now eyeing the Southeast Asian market. The company will open a store in Hong Kong around 1990. Seibu has been wary of setting up stores overseas since it closed its Los Angeles branch only ayear after it opened in 1961 because of poor sales. Furthermore, the company will also enter the Taiwan market through a capital tie-up with a local department store. Seibu Department Stores and the local store set up a joint venture with paid-up capital of¥ 100 million inNovember 1988 in preparation for opening a department store in Taiwan and for exporting and importing their products.

Seibu Department Stores set up a joint merchandising organization. the Japan Department Stores Management Association (JMA), together with 22 other department stores, including Meitetsu Department Store, Tsuruya Hyakkaten. Tokiha and Yamagataya. However, it has not been active and stopped joint merchandising in 1980. Its aims are now restricted to the exchange of information concerning management among member companies.

Mitsukoshi is one of the leading department stores in Japan and in 1987 recorded the second greatest sales volume of any Japanese department store at ¥6+3 billion.

Mitsukoshi is also the oldest department store in Japan, It was founded in **16-3** by Takatoshi Mitsui, the founder of the Mitsui Group. one of the largest of the five major corporate groupings in Japan. Mitsukoshi is a leading member of the Mitsui Group.

In total, Mitsukoshi has 41 stores including major department stores, boutiques specializing in quality clothing, and variety stores handling general merchandise and food.

Mitsukoshi has commercial affiliations with 45 regional department stores including the Chiba Mitsukoshi, the Nagoya Mitsukoshi, the Niigata Mitsukoshi and Kintetsu Department Stores in Osaka. The nature of these relations include capital investment and supply or purchasing the-ups.

Mitsukoshi's previously unrivalled position in Japan was seriously tarnished six years ago over false business dealings by the president who was forced to resign. The company now appears to be successful: overcoming this blow to its public image.

Mitsukoshi is active in overseas sales and purchasing operations with stores or offices in 1 () foreign cities. The company also has a number of exclusive distributor arrangements with n-en-known companies, such as Tiffany's; or designers, such as Oscar de la Renta.

Like many other department stores. Mitsukoshi takes an active interest in cultural activities with its ownin-store museums, theatres and cultural centres.

Takashimaya is now the third largest department store in Japan, following Seibu and Mitsukoshi. Takashimaya has six stores under its direct management inTokyo, Osaka, Kyoto, Sakai, Wakayama and Rakusai. It also has 12 stores operated by its subsidiaries or affiliated companies.

In 1971, Takashimaya formed the ''Takashimaya Hi-Land Group, " a joint merchandising organization which now comprises 23 department stores, Included in the Group are the Keio Maruei, Tamaya and Yanagen Department Stores.

Takashimaya opened Japan's first suburban shopping centre, consisting of a department store and many specialty stores, at Tamagawa in Tokyo in 1969.

Takashimaya has a good reputation as a traditional topgrade department store and has a predominant position in the gift market. It has been putting emphasis on its mail-order business recently. Takashimaya is now striving to construct a new physical distribution system to shorten the lead time from order to delivery to within five days. In 1987, the company completed an on-line network between a centre for receiving orders, a physical distribution centre and branch offices' delivery

centres. Takashimaya issues catalogs six times per annum, with 1,5 million catalogs mailed each time. The company receives about 4 million orders per year. Takashimaya has the top mail-order business among Japanese department stores, with expected sales of ± 54 billion for the year ending February 1989.

Takashimaya has setup "Takashimaya Pacific Inc." to embark on the interior design and decorating business in Hawaii.

Takashimaya is active internationally. It joined the Intercontinental Group of Department Stores, which is composed of high-class department stores throughout the world in 1956, and opened specialty stores in New York in 1958 and in Paris in 1973. Its stores are noted for their wide assortment of prestige fashion brands such as Pierre Cardin and Thierry Mugler.

Takashimaya started a travel service in 1988, arranging overseas shopping tours, museum tours. and others,

Daimaru is the fourth largest department store group in Japan. Founded in 1717, the company is largely based in the Kansai (Osaka) area, though one of the eight directly operated stores is in Tokyo, Daimaru is also affiliated with other department stores, including the Hakata Daimaru in Kyushu and the Kochi Daimaru in Shikoku.

In addition to the department store food floors, Daimaru also owns Daimaru Peacock, a supermarket chain with over 44 stores, Daimaru Peacock stores have more of an international atmosphere than most supermarkets and usually offer more imported and higher grade products. Twenty-seven of the stores are in Tokyo and vicinity. -with the remainder being around Osaka.

Daimaru was one of the first Japanese department stores to operate overseas when it opened a store in Hong Kong in 1960. Since then. it has also placed two stores in Thailand, in France, and one in Singapore. Daimaru also has eight representative offices abroad.

Daimaru has concluded a number of licensing agreements with overseas designers, including John Weite and Alain Lahlou. The Company also operates a specialty ladies clothing chain and a furniture chain.

Since 190, Daimaru has had business relations with Matsuzakaya, the leading department store in Nagoya, for joint merchandising purposes. In general however, the ties between them are not that strong.

MARUI CO., LTD.

Address: 3-8-18, Nakano, Nakano-ku, Tokyo 164, Japan Tel: O3-384Q1OI Telex: 02322742 MARUI J	
ANNUAL TURNOVER (Period endingJanuary 1988)	444098 million ven
TOTAL NUMBER OF STORES	32
LOCATION OF STORES	Eastern Japan
AVERAGE ANNUAL SALES PER STORE	13878 million yen
PROPORTION OF FOOD SALES	0'%0
TOTAL FLOOR SPACE	301000 square metres
TOTAL NUMBER OF EMPLOYEES	8026
YEAR ESTABLISHED	1937

Marui is the fifth largest department store in Japan and is well known for its volume sales made through its installment sales system. The number of holders of the "Red Card, "Marui's credit card, increased to9 million in 1987.

The company's profitability is exceptionally high compared to other department stores, After-tax profits on sales were 4.1 per cent for the year ending January 1988, the highest ratio among the top 10 department stores. The good business results are partly due to a policy of emphasizing a high-priced assortment of products for the younger generation.

Marui has been implementing a "scrap and build" policy, which indicates construction of new department stores, remodeling of existing ones and phasing out of poor performers. Sixteen Marui department stores recorded annual sales of Υ 10 billion or more in 1988, and average annual sales per store were about Υ 14 million,

In order to boost staff morale and to motivate its merchandising and sales force, the company has introduced a "junior manager" system, Persons selected as junior managers are assigned to one of814 sales units. Junior managers are given theauthority to assort products and the responsibility' to controlinventory and turnover.

Marui has been placing emphasis on marketing sundry items such as shoes, bags, stationery, jewelry and cosmetics, in addition to its designer and celebrity lines of clothing. This policy has resulted in the increase of cash payments by consumers.

The share of sales made through its installmentsystem has been decreasing to 60 per cent of the company's total sales, although its installment sales are increasing, About 50 per cent of Marui's customers are below the age of 24, For the first time Marui plans to set up a department store in Osaka around 1991.

Based on its installment plan data base, the company is reinforcing its mail-order business. Marui's response rate for direct mailings is approximately 20 per cent. which is far better than the 5 per cent goal sought by other companies in the retail industry.

Marui is eager to expand its consumer finance, travel agency and real estate services. Among them, consumer finance operations have recently grown very rapidly, becoming a key component of total operations. The company provides general-purpose loans and various specialized loans for domestic airline tickets, entertainment ticket guide services, home improvements. driver's schools. and new and used car purchases.

Matsuzakaya is the sixth largest department store in Japan, beginning as a kimono store in Nagoya in **1611**. The company now has 12 stores in Japan, including those operated by its affiliated companies.

Matsuzakaya has four overseas stores in Hong Kong, Paris and Los Angeles. The company joined theAMC (Associated Merchandising Corporation) of the U.S.A. in 1972 for purchasing foreign goods. AMC merchandise is important toMatuszakaya as a constant supply of imports and overseas information for Japanese consumers. The company also has a tie-up arrangement with Quelle of West Germany for mail-order sales in Japan,

Matsuzakaya has been conducting an international home-shopping service with Quelle. The ordered merchandise is delivered directly from Quelle to customers. In addition, Matsuzakaya has opened corner shops selling Quelle products in its stores,

Matsuzakaya has been accumulating know-how for non-retail sales using personal computers.

The company has about 40 subsidiaries in various fields, including Matsuzakaya Store, which operates a supermarket chain in the Chubu and Kanto areas. ISETAN CO., LTD.

Isetan is a traditional department store based inTokyo, and originated as a kimono store in 1886. The company entered into an overall business tie-up with various local department stores in 1973 and formed a joint merchandising organization, ADO (All Nippon Department Stores Development Organization), together with 32 local department stores, The kc}- members of the ADO are Matsuya, Marui Imai, Fujisaki. Tobu Department Store, Meitetsu Department Store. Hanshin Department Store, Tenmaya Department Store, Iwataya Department Store, Tokiha and Yamagataya. The ADO is led by Isetan, which is noted for its merchandising capabilities.especially in clothing and other fashion items.

In 1986, Isetan completed an information system connecting its stores to a POS system.

Isetan is the seventh largest department store in Japan, and has five stores in the Tokyo Metropolitan area, The company plans to open a store in Kanagawa in 1990, which will be the largest in scale of all its branches, lsetan also has three affiliated local department stores. i.e. Shizuoka Isetan, Iwataya Isetan and Niigata Isetan.

Isetan has been strengthening its mail-order business, The company will soon increase the number of catalogs issued to 200000, with a plan to increase to 500000 in two or three years. Annual sales in the mail-order business were about ¥5billion for the year ending November 1987, with expectations to reach ¥10 billion by 1991.

Sales of garments account for 50 per cent of total sales, which is about 10 per cent higher than those of major department stores such as Mitsukoshi and Takashimaya.

In 1988, Isetan began using an EOS (Electronic Ordering System) to place orders for processed foods at its Shinjuku and Matsudo stores.

YEAR ESTABLISHED	1919

Tokyu Department Store is the eighth largest department store chain and is in a similar situation t&eibu Department Stores, Tokyu, like Seibu, is part of the Tokyu group that is formed around the Tokyu Railway, one of the largest commuter train lines in Japan. Like Seibu, Tokyu is also run by one family, the Gotoh family, and it was only founded about 50 years ago.

The Tokyu group is divided into four sectors:

transportation: railway and buses;
real estate development;
distribution and retailing; and
recreation and leisure,

Again. the company is similar to Seibu in the nature of its varied business operations, The distribution and retailing group comprises about 75 companies, including department stores, supermarkets. restaurants, fast food shops, etc. The supermarket chain, Tokyu Stores, is described in the supermarket section.

Most of the Tokyu stores are in the Tokyo area, Tokyu Department Stores do not have as highquality reputation as the Seibu or Takashimaya department stores. Tokyu Department Stores generally offer lower-priced goods than the other department stores described above, and in this regard, are more characteristic of the "[rain line department stores" in Japan.

Tokyu Department Store has four stores in Hawaii. and one each in Hong Kong, Singapore and Thailand. The company is strong in food products, with a particular)' well-known food floor in its Shibuya station (Toyokoten) store,

Hankyu is the ninth largest department store chain in Japan and is another of the "train line department stores." Similar toSeibu, Hankyu is a large industrial group comprising 230 companies in the following major sectors:

•railway;

30

- •real estate;
- •hotel; and

• commerce and retail, including department stores and supermarkets.

The first Hankyu Department Store was opened in Osaka in 1929. Of the eight stores that Hankyu operates at present, five are in Osaka, with three in Tokyo. The newest was opened in October 1984 in Ginza.Hankyu Department Stores are known for their high profitability, but are not generally of the high quality (or price range) of a Takashimaya or Seibu.

Included in the commerce and retail sector of the Hankyu Group are two medium-size supermarket chains, Hankyu Oasis and Hankyu Kyoei Bussan. Hankyu also owns a third small supermarket chain, Shintetsu Enterprises,

Hankyu has representative offices in Los Angeles, London, Paris and Milan. The company also has business relations with such foreign designer firms as Madame Gres and Jean Claude de Luca of France, and Harvard Kaspar of the U.S.A.

YEAR ESTABLISHED 1919		

Sogo is the 10th largest department store in Japan. Originating in the latter years of the feudal period (1830), Sogo operates three stores directly, one each in Osaka, Kobe and Tokyo.Sogo is also affiliated with 11other department stores, including the Yokohama Sogo Department Store, opened in the fall of 1985, which is the largest single department store in Japan (approximate floor space: 68400 square metres).

Sogo has two stores overseas, one in Hong Kong and one in Thailand. The company also has representative offices in Rome and Italy. Other foreign business relations include tie-ups with designers PacoRabanne and Jean Claude Muller of France, and Angelo Litrico of Italy.

Sogo is expanding rapidly. It opened four affiliated stores in 1986. including one in Singapore, and another store in 1987. The company is also expanding the floor space of existing stores.

Sogo Department Stores do not have the prestigious reputation of a Takashimaya or a Seibu, instead Sogo is actively pursuing suburban markets and placing more emphasis on a salespolicy of "good quality at a reasonable price."

KINTETSU DEPARTMENT STORE CO., LTD.

Kintetsu is the 12th largest department store chain and is yet another of the "train line department stores' being established by the Kinki Nippon Railway in Osaka. Of the seven Kintetsu-operated stores, six are in the Osaka-Kyoto region and only one is in Tokvo.

Kintetsu is typical of most train line department stores in that business began in relatively modern times. The company is more of a second grade. reasonably priced department store. Kintetsu is also affiliated with four other department stores and two supermarket chains. The larger of the supermarket chains. Kinsho Stores, is a medium-size chain with 40 stores, all in the Nara-Osaka region. Total annual sales of Kinsho Stores is about \$55 billion (1987).

ļ

5 Superstores and Supermarkets

The following section is divided into two parts. The first is a ranking by sales of the top 85 superstore and supermarket companies in Japan, giving such basic information as the address, the number of stores, the 1987 sales volume, and the food and beverage percentage of total sales.

The second part is a more detailed outline of each of the top 17 superstore/supermarket chains, This outline is made up of a description of the major features and activities of the company and a table giving basic operating data.

Daici (pronounced dye-aye), since opening its first store in 195- has come to be the largest retailer and superstore/ supermarket chain in Japan. It has achieved thisphenomenal growth in two ways: the rapid expansion of its own directly-operated stores; and the active development of business and capital tie-ups with other medium-size supermarket chains. Daiei now directly runs 1'- stores, of which more than half are in the Osaka region and about a quarter around Tokyo. These stores had a combined sales of ¥1.5 trillion in 1987.

In addition. Date: affiliated supermarkets (usually Datei is the largest shareholder) include Uneed, the 12th largest chain in Japan and Maruetsu, the 11th largest, Both these chains are discussed later in this section.

Daiei is also connected with the second largest convenience store chain, Lawson, which is also discussed later (under convenience stores).

Daiei has tie-ups -with foreign companies, including Au Printemps(France), Lawson Milk (U.S.A.), Swift (t-, S.A.J. J.C.Penny (U.S.A.), K Mart (U. S. A.) and Kroger (U.S.A.). Daiei has 10 overseas offices, including ones in Los Angeles. New York and Seattle. Daiei is also tied to a number of restaurant or fast food chains in Japan such as Wendy's. Captain Cook and Volks, among others.

Daiei joined with CGC Japan, a voluntary chain of 170 supermarkets, and set up a joint merchandising and purchasing company, Glen" Inc.Daiei has also established a new firm, Advanced Department Stores of Japan (ADS), together with other stores such as Jujiya. AuPrintemps and Maruko. to conduct centralized buying of merchandise. Daiei has been bolstering its mail-order and door-todoor businesses. In restructuring Riccar Co., a bankrupt sewing machine manufacturer, Daiei reorganized the company into a wholly-owned subsidiary of Printemps Ginza to strengthen its mail-order business in 1988. Daiei sold more than 800000 copies of "Home World" catalog in 1987, and also transferred its door-to-door catalog sales operation to Riccar in 1988.

To cope with the severe competition from rivals in Japan and its relatively low profitability}'. Date has been urging all of its stores to use POS systems and promoting the OMC credit card, which can be used atall 5 000 group stores. The group's new system for ordering and receiving goods using aPOS set-up has reported>' contributed significantly to the improvement of inventory turnover ratios. The OMC credit card, which was first issued in 1983, boasted **3 million cardholders** in 198⁻, and has tie-ups with both VISA and Mastercard.

TO-YOKADO CO., LTD.

Ito-Yokado is the second largest superstore/supermarket chain in Japan, and like Daiei, is 2 retail conglomerate which includes several other affiliated supermarket chains, convenience stores, restaurants, food processing companies, department stores, etc.

Ito-Yokado directly operates 131 stores. In addition, affiliated supermarket chains include the 16th largest chain in Japan, Life Stores, discussed later in this section. Other affiliated store chains are:

Supermarket Chain	Number of stores	Area of Concentration
York-Benimaru	51	Tohoku
York Mart	38	(Northeast Japan) Tokyo region

Ito-Yokado is also managing Seven-Eleven, the largest convenience store chain in Japan, discussed later under convenience stores.

Other foreign companies that Ito-Yokado has business relations with are Denny's (U.S.A.). Southland (U.S.A.), Oshman's Sporting Goods (U. S. A.) and Associated Dry Goods (U.S.A.). Ito-Yokado has four overseas offices, including one in San Francisco.

Ito-Yokado is relatively old for a supermarket chain store having been founded in 1920. In 1961, the company opened Japan's first "superstore."Ito-Yokado is known for being the most profitable of the supermarket chains in Japan, The company is also proud of the strong bonds among its group company members.

Seiyu is the third largest superstore/supermarket chain in Japan and has 175 directly operated stores throughout the country, but mostly in and around the Tokyo area, Seiyu is the supermarket arm of Seibu Retail Enterprises and is a member of the Seibu Group.

Seiyu is itself a subsidiary of Seibu Department Stores. However, since Seiyu and Seibu Department Stores have invested jointly in the formation of other group companies. they are on more of an equal footing than other members of the Seibu Retail Enterprises Group,

Other affiliated companies involved with food products include:

Company	Type of operation
Seiyu Foods	Food processing and manufacturing
Roly Doll	Ice cream shops
Серро	Fast food chain
Family Mart	Convenience store chain (fifth
	largest in Japan)
Shell Garden	Premium-priced supermarket in
	Tokyo area

Seiyu also has a licensing arrangement with Sears, Roebuck (U, S.A.) and Jewel Companies (U.S.A.), and several overseas offices, including one in Chicago,

Seiyu was the first Japanese retailer to open a supermarket in Beijing, China, handling mainly food and sundries and catering to the Japanese expatriatecommunity. Seiyu plans to set up a company to handle Mujirushi Ryohin (no-brand products) in order to expand its franchise business, and to begin wholesale sales to various retailers such as department stores.

In 1988, the Seibu Saison Group setup "Seiyu Finance Asia" in Hong Kong, for extending financial assistance to companies in the "Newly Industrializing Economies" to help nurture business relationsbetween Japanese and other Asian companies.

JUSCO CO., LTD.

Address: 1-1, Kandanishiki-cho, Chiyoda-ku, Tokyo 101, Jap Tel: 03-2967871 Telex: 2225528, 2222570 JUSCO J	pan

YEAR ESTABLISHED	1926

Jusco is the fourth largest superstore/supermarket chain in Japan. It was formed in 1969 from a merger of three supermarket chains in the Osaka and Nagoya regions. Of the 163 Jusco stores, 64 are in the Kinki area, 47 are in the Chubu area and 52 are in other areas. Total sales are \pm 807 billion (1987).

Jusco is affiliated with some of the leading supermarkets in other regions of Japan such as:

Supermarket	Number	Area of
Chain	of Stores	Concentration
Kakudai Jusco	9	Miyagi
Isejin Chain	24	Ibaragi
Ojiya Jusco	18	Chiba
Hokuriku Jusco	17	Ishikawa
Fukuoka Jusco	14	Fukuoka

Similar to other major chains, Jusco is actively developing additional areas of its food service business, including fast food chains, convenience stores and family restaurants. Jusco helped form AIC along with three other major Japanese chains (Uny Izumiya and Chujitsuya) in 1979, AIC was established for the purpose of joint purchasing from overseas sources. Safeway joined AIC in 1981 and Promodes, the second largest supermarket chain in France, is also expected to join.

Jusco has a joint venture with General Mills for the promotion of Red Lobster restaurants. Jusco's three overseas offices are in Brazil, Korea and Australia.

NICHII CO., LTD.

YEAR ESTABLISHED	1963

Nichii is the fifth largest superstore/supermarket chain in Japan and, similar to Jusco, was formed through a merger comprising three medium-sized chains and one wholesaler. At present, Nichii directly operates 159 stores with total sales of about ¥568 billion (1987). More than half the Nichii stores are in the Osaka region, with only 25 stores around Tokyo and the rest generally in the southern half of the country,

Similar to the other major chains, Nichii is involved in a number of ventures. including some other supermarket chains, restaurants, fast food, specialty stores, consumer finance, travel agencies, etc.

Nichii started as a clothing supermarket and then added the selling of food to its activities. As a result, a larger portion of Nichii's sales are non-food compared to the other supermarket chains. However, the company is putting more emphasis on food and its sales ratios are gradually changing.

Nichii supplies products to 200 independent retailers through its Nippon Allied Chain (NAC), which is a voluntary business association,

In overseas activities most of Nichii's connections are with clothing companies. Overseas food-related tie-ups include franchising for Arby's fast food; exclusive sales rights for the products of the Vienna Sausage Manufacturing Co.; and management know-how on hamburger restaurants from Fuddruckers. Among its overseas offices, Nichii has one trading office in the United States. UNY CO., LTD.

YEAR ESTABLISHED	1950

Uny is the sixth largest superstore/supermarket chain and was formed through the merger of two chain stores in the Nagoya area of Japan. At present, Uny directly operates **106** stores in the central part of Japan, with total sales of about ¥451billion,

Uny has been diversifying in both the retail and nonretail sectors. In retailing, Uny has set up subsidiaries such as U store (a supermarket chain), CircleK Japan (convenience store under a licensing agreement with Circle K Corp. of the U. S. A.) and Sagami (a specialty kimono store). Uny has been developing its non-retail sector customerservices with ventures such as a travel agency, a real estate brokerage and telecommunications services.

To diversify its business, the company established tieups with the following overseas companies besides Circle K: Winchell's Donut House, a division of Denny's of the U.S.A., to operate doughnut restaurants: Vendex International of the Netherlands, to use its know-how for operating department stores and specialty store chains; Comp-U-Card International of the U.S. A., to introduce computer terminal shopping services; and Micro Age Computer Stores, to move into the computer specialty store franchise business.

Uny has been opening specialty stores such as Handih, Tom Tom and Almo.

In 1979, Uny joined AIC, an organization which purchases various merchandise from overseas jointly with four other major supermarket chains. i.e. Jusco, Izumiya, Chujitsuya and Uneed (Uneed left the organization in 1981). In March 1985, Uny established a convenience store, "Circle K Convenience Smre (HK)," jointly with Li and Fung of Hong Kong and Circle K International, a subsidiary of Circle K of the L'. S.A. In 1987, Uny opened its first supermarket with floor space of 13 000 square metres in Hong Kong.

AVERAGE ANNUAL SALES PER STORE	4203 million yen
PROPORTION OF FOOD SALES	44%
TOTAL FLOOR SPACE	325000 square metres
TOTAL NUMBER OF EMPLOYEES	4053
YEAR ESTABLISHED	1949

Izumiya attained annual sales of Y320 billion for the year ending February 1988, surpassing Nagasakiya. Izumiya is now the seventh largest supermarket chain in Japan, handling mainly clothing and food.

Izumiya setup AIC (Allied Import Co,) in 1979, to jointly purchase various types of merchandise from overseas sources, in co-operation with Jusco, Chujitsuya, Uny and L'need (Unced left the organization in 1981).

Izumiya has been diversifying its business — in 1979, Izumiya commenced franchise business operations and, as of 1988. the company has 14 franchises in the western part of Japan, hoping to increase the number rapidly. In 1982, the company also embarked on automobile sales as a member of Autorama.

Izumiya is introducing a main frame host computer and POS system to cope with its proposed business expansion. In 1986, the company completed an on-line network among its headquarters, branch outlets and delivery centre.

Izumiya opened its first two stores in the Kanto region in 1987; the Ushiku Store in Ibaraki prefecture and the Yachiyo Store in Chiba prefecture,

Izumiya has made continuous efforts to increase membership in its Izumiya Card Scheme since 1985.

Izumiya has more than 50 affiliated companies such as Sun Sports. Pelican, Sun Fresh, SunRolly and Sun Foods,

NAGASAKIYA CO., LTD.

TOTAL NUMBER OF EMPLOYEES	3388
YEAR ESTABLISHED	1948

Nagasakiya is the eighth largest supermarket chain and handles mainly clothing from its 114 shops throughout Japan.

Nagasakiya was setup in 1948 as a retail store for bedding and clothing in the suburbs of Tokyo. Due to its historical background, its sales of clothing annually exceed **60** per cent of total sales. The company's store brand, "Sunbird" (clothing), started in 1970 and has influenced the development of original brands by other supermarkets. The company operates a chain of "Sunbird" franchise stores which number 320 outlets, including franchisees such as Kasumi Co,

Nagasakiya plans to introduce a POS system to all 1 400 stores belonging to the group which includes restaurants and specialty stores, As a first step,Nagasakiya will install a POS system in its 114 supermarkets by 1989. After the introduction of the POS system, the compiled data will be controlled and managed by Sun Joho Kaihatsu, an affiliate of Nagasakiya.

Nagasakiya merged its trading affiliates, Sun East International and Sun Trading, in September 1988 to reinforce its "develop and import" trade. The new trading company, named "Sun East, " has paid-up capital of \$203 million, Sun East International has representative offices in the Philippines and Thailand.

Nagasakiya also operates "Sunkus," a franchise convenience store chain, which now has about 320 stores, owned Or franchised in Hokkaido, and the Tohoku and Kanto areas, enjoying rapid expansion since 1985. Nagasakiya is presently putting emphasis on bolstering its food section. The company engages in food sales via its subsidiary, Sundore Group, which operates 47 stores with annual sales of ¥50 **billion** for the year ending February 1988. Nagasakiya has decided to absorb and merge its subsidiaries, Sundore and Sundore Hokkaido. in 1989, to strengthen its food business.

Nagasakiya is engaged in the family restaurant business through its subsidiary, "Oasis," which operates **65** stores in Nagasakiya supermarket stores. Nagasaki}-a also operates 15 suburban "IHOP" restaurants through a tie-up with IHOP (International House of Pancakes) of the U.S.A.

YEAR ESTABLISHED	1947

Kotobukiya is the ninth largest supermarket chain in Japan, with 148 stores almost entirely in Kyushu. The company is not a member of any specific corporate grouping.

Kotobukiya was started in 1947 as a cosmetics and clothing retailer and did not begin marketing food products until **1961. Much** of its food products are handled by its 43 K Combie stores, for which food usually amounts to 80 per cent or 90 per cent of total sales, All but seven of Kotobukiya's stores offer at least some food products,

Kotobukiya's other food-related businesses include:

Type of Operation

Company

Hakusho	Supermarket chain
Hyuga	Supermarket chain
Ejimaya	Supermarket chain
Gruppe	Restaurant
Kotobukiya Bakery	Bakery

Kotobukiya has one overseas office in Taiwan

CHUJITSUYA CO., LTD.

YEAR ESTABLISHED	1954

Chujitsuya is the IOth largest supermarket chain in Japan. Its 77 stores are mainly located in suburban Tokyo. The company is a member of the AIC group.

Chujitsuya began as a small dry goods shop in 1933 and changed into a full supermarket business in1960. One of Chujitsuya's major characteristics is the location of large stores, with spacious parking lots, at many of its suburban sites. Chujitsuya is another highly diversified supermarket chain. Its major food-related subsidiaries are:

Company Type of Operation

Co-op Meat	Meat packing
World Foods	Food processing
K.C. Suisan	Seafood wholesaling
Nice	Premium supermarket

Chujitsuya has also licensed with Hungry Tiger, the U.S. seafood chain, as a franchiser in Japan,

THE MARUETSU, INC.

TOTAL NUMBER OF EMPLOYEES	8421 Full-time: 4 136 Part-time: 4 285	
YEAR ESTABLISHED	1943	

While Maruetsu is the 11th largest supermarket chain in Japan, it considers itself the largest *food product supermarket chain*. This does not mean that Maruetsu sells more foodstuffs than Daiei, but as a proportion of food sales to total sales, Maruetsu's 77 per cent is more than twice as high as Daiei (29 per cent), On the other hand, though Maruetsu has a high proportion of food sales. it also has many new stores which offer a large complement of dry goods,

All of Maruetsu's 173 **stores are located** in the Kanto-Tokyo area, As a member of the Daiei group, it helps fill Daiei's lack of stores in the Tokyo region. Maruetsu began as an independently- operated food store in 1945, adopting the name Maruetsu only in 19-4. One of its major expansions occurred in 1981 when it absorbed another large Daiei group member, Sanko.

Maruetsu was a late starter in the development of other lines of retail business. Recently, it has been making an extra effort to catch up in this areaby expanding its business base, In regard to food products, new endeavours include:

Tokyu Store is the supermarket sector of the Tokyu group, whose parent is Tokyu Railway. In this regard, Tokyu's position is similar toSeiyu stores (discussed above), whose parent is the Seibu Saison Group.

Tokyu stores are mainly in the Tokyo region and are often found in or near the train stations of the parent company. Tokyu Store was first established in**1956** and, with the considerable financial strength of the Tokyu group behind it, has managed to grow to 83 stores. Tokyu Store has grown two per cent to four per cent per year over the last few years. Tokyu hopes to improve its performance by opening large. multipurpose stores.

Tokyu Stores has been slow to develop its own affiliated businesses to the same extent as have the other major chains.

Marushoku is the 14th largest supermarket chain in Japan. The company is based mainly in the Kyushu and Chugoku (around Hiroshima) regions. It is not an official member of any other supermarket chain or grouping,

Marushoku was founded in Kyushu in **1947 as** a small food store. Over the years, it added food processing and manufacturing, opening its first supermarket in 1955. Since then, it has grown to 176 **outlets, all** directly **operated**. In **addition**, Marushoku **has seven affiliated supermarket** chains in Kyushu and Chugoku.

Unlike most of the other chains of its class, it appears Marushoku has made no effort to branch out into other businesses outside of basic supermarket operation,

Inageya is the 17th largest supermarket chain in Japan, with 98 supermarkets located in the Kanto (Tokyo) region. Inageya is mainly a food product supermarket.

Beginning as a small food store in the Meiji period, the company introduced the self-service format in 1956. Its main growth occurred after 1975 and recently the company introduced a number of mini-supermarkets, Inageya is not a member of any purchasing or merchandising group.

Inageya mav develop a greater interest in developing affiliated companies than it has in the past in order to maintain a good measure of growth. For the time being, however, the company has only one food-related affiliate, a small food processor, Sun FoodJapan.

6 Convenience Stores

The following section is divided into two parts. The first is a ranking by sales of the top 20 convenience store and mini-super chains in Japan, giving such basic data as the address, the number of stores in the chain, [he 1987 sales volume, and the food and beverage percentage of total sales.

The second part is a more detailed outline of the top six convenience store and mini-super chains. This outline is made up of a description of the major features and activities of the company and a table giving basic operating data.

Company	1987 Sales		
	Total (million ¥)	Food & Beverage (%)	No. of Stores

Seven-Eleven has proven tremendously successful in Japan and is easily the largest of the convenience stores, with sales more than double its nearest competitor. The company has enjoyed excellent growth since it opened its first store in 1974. There are now 2964 **Seven**-Eleven outlets all over Japan, As yet, there is still much room for expansion.

Seven-Eleven's operations are carried out very similarly to those in North America, with a comparable combination of fresh food, fast food and sundry items. The mix of products, however, includes many that are distinctly Japanese, i.e. bento (box lunches), or instant noodles, Still, many products, soft drinks, hamburgers, frozen food, are very similar to North American products.

Seven-Eleven franchise rights are controlled in Japan by Ito-Yokado and the company is part of the Ito-Yokado group,

K.K. LAWSON JAPAN

Address: 9-1, Toyotsu-Machi, Suita-shi, Osaka 564, Japan Tel: 06380-4491

TOTAL NUMBER OF EMPLOYEES	2096
YEAR ESTABLISHED	1975

Lawson Japan is owned and operated by the Daiei retail conglomerate, under license from Lawson Foods of the United States, Lawson is the second largest convenience chain in Japan and its 1 831 outlets are located throughout the country, with half in the Osaka area.

The first Lawson's opened in 1975. It is typical of the convenience store product mix in that it sells little fresh food. Processed food and sundry goods make up the largest proportion of products sold and fast foods also do well.

Lawson is similar to Seven-Eleven in that the trade marks and organization are licensed from an American chain by one of the major Japanese retail corporations.

Sun Shop Yamazaki is the third largest convenience store chain in Japan. The company is owned and operated by Yamazaki Bread Co., which is the largest bread maker in Japan and has a very successful joint venture with Nabisco to market Nabisco products in this country.

Sun Shop Yamazaki was founded in **19-**" and has rapidly grown to 1 **657 outlets**, The company has averaged about 50 new branches annually for the last three years. Virtually all the stores are franchises.

Sun Shop Yamazaki is more typical of the "Seven-Eleven" type of convenience store as it sells little fresh food. Its largest sales are in processed foods and dairy products, KMART CHAIN CO., LTD.

Address: 2-2-20, Shimanouchi, Minami-ku, Osaka 542, Japan Tel: 06-212-2541		
ANNUAL TURNOVER (Period ending March 1987)	127600 million yen	
TOTAL NUMBER OF STORES	1 012	
LOCATION OF STORES	Nation-wide	
AVERAGE ANNUAL SALES PER STORE	126 million yen	
PROPORTION OF FOOD SALES	95%	
TOTAL FLOOR SPACE	N.A.	
TOTAL NUMBER OF EMPLOYEES	N.A.	
YEAR ESTABLISHED	1978	

The K Mart Chain in Japan is unrelated to the wellknown K Mart stores in North America and the type of business is completely different. The Japanese "K Mart Chain" is a chain of convenience stores, with a few stores that fall in the mini-super range (400-500 square metres floor area).

The K Mart Chain is voluntary, with no directly operated outlets. The major products sold are fresh foods and processed foods. Fast foods are a very minor item for K Marts in Japan.

K Mart was founded in 1964 and is the fourth largest convenience store chain in the country. The 1 012 outlets are spread throughout the island of Honshu, and are not often found on any of the other major islands. Most of the outlets are in western Honshu. FAMILY MART CO., LTD.

Address: 4-27-10, Higashi Ikebukuro, Toshima-ku, Tokyo 170, Japan Tel: 03-989-6600		
ANNUAL TURNOVER (Period ending February 1987)	126476 million yen	
TOTAL NUMBER OF STORES	1007	
LOCATION OF STORES	Nation-wide	
AVERAGE ANNUAL SALES PER STORE	126 million yen	
PROPORTION OF FOOD SALES	75%	
TOTAL FLOOR SPACE	N.A.	
TOTAL NUMBER OF EMPLOYEES	N.A.	
YEAR ESTABLISHED	1981	

Family Mart is the fifth largest convenience store chain in Japan. Owned by Seiyu stores, Family Mart is part of the Seibu Saison group. Since opening its first store in 1978, Family Mart now has 1 007 outlets, with over 90 per cent of them in the Kanto (Tokyo) region.

Family Mart is clearly accelerating its expansion, with plans to enter the Chubu region around Nagoya.

Family Mart stores have a product mix typical of Western-style convenience stores, with little fresh food and an emphasis on processed foods, Fast food isonly a moderate item at Family Marts.

Over 90 per cent of Family Marts are franchises. "Family Mart brand" goods such as milk, bread and canned beverages, are growing and fast foods with high gross profit ratio are doing well.

K.K. SUN CHAIN

Address: 17-4,Ueno 3-chome, Taito-ku, Tokyo110, Japan Tel: (03) 854-9121		
ANNUAL TURNOVER (Period ending February 198-)	80973 million yen	
TOTAL NUMBER OF STORES	648	
LOCATIOX OF STORES	Nation-wide	
AVERAGE ANNUAL SALES PER STORE	125 million yen	
PROPORTION OF FOOD SALES	76%	
TOTAL FLOOR SPACE	2" 392 square metres	
TOTAL NUMBER OF EMPLOYEES	2064	
YEAR ESTABLISHED	1976	

Sun Chain is the sixth largestconvenience store chain in Japan. A member of the Daiei group (Daiei is one of the two sole shareholders) Sun has expanded rapidly across Japan since it began operations in 1976, and now has 648 outlets. Approximately half of the outlets are in the Tokyo area. A special characteristic of the Sun Chain is that almost all the outlets are open 24 hours a day.

Sun Chain is very similar in format to the Western-style convenience stores in Japan such as Lawson, Daiei's other convenience store chain. Like Lawson, Sun sells little fresh food, and instead concentrates on processed food and dairy products.

About half of Sun Chain's outlets are franchised, with the other half being directly owned and operated by Sun itself. Company policy seems to be to change directly operated stores into franchises.
